1. INTRODUCTION	pg 3
1.1. DESCRIPTION	pg 3
1.2. OBJECTIVES	pg 3
1.3. THE STRUCTURE OF THE PROGRAM	pg 4
2. THE PROGRAMS	pg 5
2.1 scriptSelector.py	pg 5
2.2 task1.py	pg 5
2.3 task2.py	pg 6
3. SOME STATISTICS	pg 11

1. Introduction

1.1 Description

This is a report document of the code in Python for project ../ex1. The files of the project are:

- > **scriptSelector.py**
- > **task1.py**
- > **task2.py**

1.2 Objectives

The objective of the document is to extract from the project coded in Python the main components, with the functions, the variables. This is the way to have a better understanding of the code, and to shorten the time to manage any improvement or modification of the code.

The document includes:

- > **The functions**
- > **The variables**
- > **The relationship between them**
- > **The imported libraries**
- > **The list of comments**

1.3 The structure of the project

The structure of the code is:

2. The programs

The list of the programs of the project is detailed in the next section

2.1 scriptSelector.py

Imported libraries are:

- > **task1: line 1**
- > **task2: line 2**

Defined functions are:

- > **There are no defined functions**

The comments on code are:

- > **we exit the infinite loop: line 9**
- > **Case insensitive: line 7**

The used variables are:

- > **mode**
 - **First use in line 5**
 - **Next uses:**
 - # **Use: line 8, 10, 12,**

The used functions are:

- > **From task1:**
 - **.main(): line 11**
- > **From task2:**
 - **.main(): line 13**
- > **Generic:**
 - **input(): line 5**
 - **lower(): line 5**

2.2 task1.py

Imported libraries are:

- > **pdfkit: line 1**
- > **requests: line 2**

Defined functions are:

- > **main(): line 5**

The comments on code are:

- > **generate the pdf: line 13**
- > **and change the encoding to make sure special characters get rendered properly in the pdf: line 11**
- > **we get the text from the url, then remove the marquee from the original document: line 10**
- > **get the information from the url: line 7**

The used variables are:

- > **url**
 - **First use in line 6**
 - **Next uses:**
 - # **Use: line 7,**
- > **r**
 - **First use in line 7**
 - **Next uses:**
 - # **Operators:**
 - > **.text: line 9**
- > **html**
 - **First use in line 9**
 - **Next uses:**
 - # **Use: line 13,**

The used functions are:

- > **From requests:**
 - **.get(): line 7**
- > **From pdfkit:**
 - **.from_string(): line 13**
- > **Generic:**
 - **get(): line 7**
 - **replace(): line 9, 9, 9**

2.3 task2.py

Imported libraries are:

- > **requests: line 1**
- > **random: line 2**
- > **pdfkit: line 3**
- > **BeautifulSoup: line 4**

Defined functions are:

> **main(): line 7**

The comments on code are:

- > **Partial Table: line 67**
- > **Complete Table: line 63**
- > **if the last number given by the user is larger than the number of verbs remaining, we adjust it: line 47**
- > **Pdf formatting: line 31**
- > **We retrieve the verbs and store them for later use: line 12**

The used variables are:

- > **verbInfo**
 - **First use in line 8**
 - **Next uses:**
 - # **Use: line 9,**
- > **verbDoc**
 - **First use in line 9**
 - **Next uses:**
 - # **Use: line 10,**
- > **soup**
 - **First use in line 10**
 - **Next uses:**
 - # **Operators:**
 - > **.stripped_strings: line 18**
- > **infinitive**
 - **First use in line 13**
 - **Next uses:**
 - # **Operators:**
 - > **.append: line 21**
- > **past**
 - **First use in line 14**
 - **Next uses:**
 - # **Operators:**
 - > **.append: line 23**
- > **pastParticiple**
 - **First use in line 15**
 - **Next uses:**
 - # **Operators:**
 - > **.append: line 27**
- > **catalan**
 - **First use in line 16**

- Next uses:
 - # Operators:
 - > .append: line 29
- > head
 - First use in line 33
 - Next uses:
 - # Use: line 89, 90,
- > verblists
 - First use in line 38
 - Next uses:
 - # Reassignment: line 49,
 - # Use: line 49, 52,
 - # Operators:
 - > .append: line 44
- > numVerbs
 - First use in line 39
 - Next uses:
 - # Use: line 42, 47, 48,
- > n
 - First use in line 41
 - Next uses:
 - # Reassignment: line 45, 48,
 - # Use: line 42, 47, 45, 48, 49,
- > userInput
 - First use in line 43
 - Next uses:
 - # Use: line 45, 44,
- > lastVerb
 - First use in line 51
 - Next uses:
 - # Reassignment: line 91,
 - # Use: line 62,
- > answerSheet
 - First use in line 54
 - Next uses:
 - # Reassignment: line 64, 87,
 - # Use: line 64, 87, 89,
- > quizSheet
 - First use in line 58
 - Next uses:
 - # Reassignment: line 72, 76, 80, 84, 88,

- # Use: line 72, 76, 80, 84, 88, 90,
- > **c**
 - First use in line 69
 - Next uses:
 - # Use: line 71, 75, 79,
- > **readStrings**
 - First use in line 18
 - Next uses:
 - # Use: line 19, 20, 22, 24, 28,
- > **index**
 - First use in line 52
 - Next uses:
 - # Use: line 89, 90,
- > **string**
 - First use in line 18
 - Next uses:
 - # Use: line 19, 25, 21, 23, 27, 29,
 - # Operators:
 - > .append: line 26
- > **number**
 - First use in line 52
 - Next uses:
 - # Use: line 62, 54, 58, 91,
- > **x**
 - First use in line 62
 - Next uses:
 - # Use: line 64, 65, 72, 73, 76, 84, 85,

The used functions are:

- > **From requests:**
 - .get.text(): line 9
- > **From BeautifulSoup:**
 - (): line 10
- > **From random:**
 - .randint(): line 69
- > **From pdfkit:**
 - .from_string(): line 89, 90
- > **Generic:**
 - get(): line 9
 - enumerate(): line 18, 52
 - append(): line 21, 23, 26, 27, 29, 44
 - int(): line 43

- **input():** line 43
- **len():** line 49, 49
- **format():** line 54, 58, 64, 72, 76, 80, 84, 89, 90
- **range():** line 62

3. Some statistics

The project has 3 programs, with 2 defined functions. The program defines 25 variables and import 4 libraries (external libraries) on 130 lines of python code.
